1. Introduction to Jiangsu University

Located in the historic and vibrant city of Zhenjiang, Jiangsu Province, China, Jiangsu University (JSU) was founded in 1902 and has evolved into a comprehensive institution over its 120-year history. JSU is well-known among China's best institutions for its 18 bachelor's degree programs taught in English, distinguishing it from the competition. Over 2000 international students from worldwide have enrolled in undergraduate and postgraduate programs by 2022. According to the latest ESI Ranking, JSU improved its ranking to 45th in 2022 among China's universities. In the World University Ranking of Times Higher Education (2022), JSU comes out Top 700 in the world. In the QS Asian University Ranking (2023), JSU is ranked 182nd. On ARWU Ranking, JSU ranks world Top 300.

JSU provides students with a better knowledge of Chinese culture and traditions by visiting historical museums and places. JSU is famous for its innovative teaching methods and vibrant student life. Mixing classwork with adequate immersion in extracurricular activities has always been the genuinely excellent academic method with the most promising result.

International multilateral cooperation is nowadays so much valued that JSU initiated and participated in many international alliances to promote study and research. Jiangsu University "Belt and Road" University-Enterprise Alliance for Educating and Cultivating International Talents is the first local university-enterprise alliance with the mode of "1+N" in China. It builds a new platform for international talents and develops a new mode for cultivating diverse talents at home and abroad, which comprehensively improves the quality and level of international talent training and achieves more and greater cooperation results.

JSU enjoys a national reputation of being among the top comprehensive academic institutions for engineering sciences with several innovative awards and patents for its achievement and contribution to China. Other academic disciplines have also witnessed considerable growth in their research faculty and the quality of graduates they turn out yearly.

These years JSU has promoted many institutions for the international education. Experts and scholars, entrepreneurs and students at home and abroad pool their wisdom and call for the synergies between industries, universities and other institutes. In particular, “Belt and Road” College of International Talents and Industry-Education Integration Research Institution are expected to complement each other in a positive way, fostering the development paradigm with domestic and international circulations, in order to boost the high-quality international education.

The above all efforts have continually made JSU enjoy an influx of international students from all continents with resultant increased growth in linkages and exchange programs with other educational institutions around the world.

2. Bachelor's Degree Programs

2.1 What Makes JSU's Bachelor's Programs Unique?

Hands-on Experience

- ✧ Our students study fundamental and applied professionalism and the influence of education on the competitiveness and sustainability of an organization.
- ✧ Throughout the course, the significance of ethical, social, moral, and personal responsibility is emphasized. It is ingrained in our classrooms and hands-on learning activities.
- ✧ We investigate the worldwide environmental influence on academic disciplines, and our courses teach students how practices in other nations and cultures vary considerably.
- ✧ Across each major, we develop principles, which become themes that are pursued across the curricula and any contextual learning opportunities. It's all part of our attempt to assist students in remembering what they have learned and provide them with a solid platform to build well throughout their educational journey and beyond.
- ✧ The university-enterprise cooperation breaks the relatively closed school-running mode, directly merging knowledge innovation and talent training into the industrial upgrading, regional development and national strategic environment, and actively enriches the job-oriented undergraduate programs.
- ✧ First-hand experience and opportunity to integrate with Chinese and international students from across the globe. This rich experience and community offer a unique opportunity to learn and share cultural values and avenue to develop long lasting friendship and relationships.

2.2 Bachelor's Degree Programs in English Medium

Bachelor's degree programs in English medium are organized into six groups:

	Categories	Majors
1	Business & Economics	1. Accounting 2. Business Administration 3. Corporate Finance 4. E-Commerce 5. International Economics and Trade
2	Engineering	6. Agricultural Mechanization and Automation 7. Energy and Power Engineering 8. Materials Science and Engineering 9. Mechanical Design, Manufacturing and Automation 10. Vehicle Engineering
3	Food & Chemistry & Pharmacy	11. Chemical Engineering and Technology 12. Food Quality and Safety 13. Food Science and Engineering 14. Pharmacy
4	Computer Science	15. Computer Science and Technology
5	Civil Engineering	16. Civil Engineering 17. Construction Management (Intelligent Construction and Management)
6	Medicine	18. Clinical Medicine (MBBS)

* Students admitted for a specific group will study one year together with all students who are in the same group, possibly changing their major after completing the first year.

Business & Economics

S/N	Name of Program	Duration	Seats
1	Accounting	4 years	20
2	Business Administration	4 years	30
3	Corporate Finance	4 years	20
4	E-Commerce	4 years	20
5	International Economics & Trade	4 years	30

Accounting

Program Introduction

This program aims to create high-quality graduates who are both rigorous and inventive, along with excellent technical skills and well-developed and professional reasoning and problem-solving abilities. Accounting informs decision-makers, managers, investors, creditors, labor unions, government regulators, and anyone interested in a business organization's financial circle and future. Accounting is a great place to start for ambitious leaders who want to play a key role in driving organizational success. Students will learn how to make strategic business decisions by developing analytical thinking and data abilities. The curriculum will be organized around three main topics: accounting, management, and economics.

Program Duration	4 Years
Tuition	18,000 CNY per Academic Year
College or Department:	School of Finance and Economics
Graduation Requirements:	Pass all credits; Finish graduation project and defense; Pass HSK level 4
Degree Awarded	Bachelor of Management in Accounting

Key Courses:

Accounting	Fundamental Accounting, Financial Accounting, Auditing, Accounting Practice of Informatization and Cost Accounting
Management	Principles of Management, Financial Management
Economics	Micro-economics, Macro-economics, Economic Law

Business Administration

Program Introduction

JSU BBA curriculum, which already has a solid reputation among companies, provides students with a comprehensive understanding of business administration from both a holistic and methodological standpoint. Throughout the curriculum, we lay a strong emphasis on developing our students' personalities and honing their communication abilities. JSU expects its students to be not only thoroughly familiar with all essential and current business concepts and practices, but also to be able to think analytically and creatively, and most importantly, to apply their acquired knowledge judiciously in practical situations they may encounter in a professional context after graduation. Students can become acquainted with Business Regulation, Trade Rules, and Economic Performance Analysis. Students can also use the various SEMs labs and engage in quantitative and qualitative data gathering, processing, and management software use.

Program Duration	4 Years
Tuition	18,000 CNY per Academic Year
College or Department	School of Management
Graduation Requirements	Pass all credits; Finish graduation project and defense; Pass HSK level 4
Degree Awarded	Bachelor of Management in Business Administration

Key Courses

Economics	Principles of Economics, Economic Law
Accounting & Finance	Operational Research, Business Statistics, Accounting, Financial Management
Management	Principles of Management; Operation Management, Human Resource Management, Organization Behavior;

Corporate Finance

Program Introduction

As a graduate of this financial management degree, you will be able to read and comprehend financial accounts, analyze company proposals, and learn about the capital and money markets. Corporate Finance, as an honorary program at our university, offers students a diverse range of academic opportunities as well as a potential professional path. This curriculum covers the most recent financial theories and international accounting standards as they apply to public businesses, multinational corporations, and international capital markets. We place a high value on improving students' employment skills. JSU has established its UpSkill initiative, which strengthens and develops the abilities that are most in demand in the job market, ensuring that our graduates have a competitive advantage in job applications.

Program Duration	4 Years
Tuition	18,000 CNY per Academic Year
College or Department	School of Finance and Economics
Graduation Requirements	Pass all credits; Finish graduation project and defense; Pass HSK level 4
Degree Awarded	Bachelor of Economics in Corporate Finance

Key Courses

Courses include Financial Management (from primary to advanced)		Accounting (IFRS)	Managerial Accounting	Corporate Financial Management
Financial Analysis	International investment	Multinational Financial Management	International Accounting	International Settlement

E-Commerce

Program Introduction

Students interested in obtaining a bachelor's degree in electronic commerce can enroll in the undergraduate program at the School of Management. This curriculum provides the technical and management expertise required to solve company problems and capitalize on Internet-created possibilities. Students learn how to develop, plan, construct, and manage e-commerce systems, as well as how to incorporate them into an organizational information strategy. This program seeks to develop high-level, multidisciplinary, specialized, and inventive skills with understanding of management, economics, law, computer science, and electronic commerce, as well as the humanistic spirit, scientific quality, credibility, and honesty. Graduates are equipped to work as e-commerce consultants, information administrators, or technical managers.

Program Duration	4 Years
Tuition	18,000 CNY per Academic Year
College or Department	School of Management
Graduation Requirements	Pass all credits; Finish graduation project and defense; Pass HSK level 4
Degree Awarded	Bachelor of Economics in Electronic Commerce

Key Courses

Principle of Management	Economics	Electronic commerce	Electronic commerce network and communication	Database principle and application
Electronic commerce security and payment	Internet marketing planning and practice	Customer relationship management	Business big data analysis and mining	Electronic commerce webpage and website design

International Economics and Trade

Program Introduction

The program is aimed to develop advanced specialized and multidisciplinary abilities for doing business and managing in foreign economies and trade sectors, as well as multinational corporations. Graduates will have a solid understanding of economic fundamentals, basic theories and practices of international trade, the evolution of modern international economics and trade, the social, economic, and cultural conditions of major trading partners, and the current state and future trends of modern science and technology. Graduates will be conversant with current international trade norms and practices, as well as China's foreign economic, trade, and regulatory policies.

Program Duration	4 Years
Tuition	18,000 CNY per Academic Year
College or Department	School of Finance and Economics
Graduation Requirements	Pass all credits; Finish graduation project and defense; Pass HSK level 4
Degree Awarded	Bachelor of Economics in International Economics and Trade

Key Courses

Principles of Management	International finance	Micro-economics	Theory of international trade	Money and banking
Practice of international trade	International marketing	Statistics	World economy	Commodity studies of foreign trade
Econometrics	Multinational management	International technology trade	International business negotiation	

Engineering

S/N	Name of Program	Duration	Seats
1	Agricultural Mechanization and Automation	4 years	20
2	Energy and Power Engineering	4 years	20
3	Materials Science and Engineering	4 years	20
4	Mechanical Design, Manufacturing and Automatization	4 years	30
5	Vehicle Engineering	4 years	20

Agricultural Mechanization and Automation

Program Introduction

Jiangsu University adheres to the distinctive characteristics and advantages of “agriculture involved in industry, agriculture supported by industry”. Currently, School of Agricultural Engineering has 102 faculty and staff members, including 18 doctoral supervisors and 49 senior titles. 96.3% of them have got PhD degrees. Among them, there is 1 academician of the Chinese Academy of Engineering, 2 specially-appointed academicians, 7 national-level talents, and 37 provincial- and ministerial-level talents. Besides, the school has 3 innovation teams of Jiangsu Province.

Program Duration	4 Years
Tuition	20,000 CNY per Academic Year
College or Department	School of Agricultural Engineering
Graduation Requirements	Pass all credits; Finish graduation project and defense; Pass HSK level 4
Degree Awarded	Bachelor of Engineering in Agricultural Mechanization and Automation

Key Courses

Engineering graphics	Electrical engineering and electronics	Agricultural machinery	Mechanical Engineering
Facility agricultural engineering and planning and design	Mechanical principles and design	Agricultural equipment control engineering basics	Agricultural Engineering
			Control Science and Engineering

Energy and Power Engineering

Program Introduction

Founded in 1963, Energy and Power Engineering is awarded as national first-class undergraduate program in Jiangsu University. The academic discipline of energy and power engineering is the national key discipline. In 2020, it was ranked the top 5% among Chinese universities. This program cultivates talents with scientific humanistic quality, professional ethics, innovative spirit and practical ability with international vision, and masters the basic theories and professional knowledge in the field of energy and power engineering. Students have the ability of analyzing and solving problems, scientific thinking, teamwork, communication and constant learning. The trained talents are qualified for energy and power engineering and related fields of product development, engineering design, system operation and project management and other engineering technologies.

Program Duration	4 Years
Tuition	20,000 CNY per Academic Year
College or Department	School of Energy and Power Engineering
Graduation Requirements	Pass all credits; Finish graduation project and defense; Pass HSK level 4
Degree Awarded	Bachelor of Engineering in Energy and Power Engineering

Key Courses

Engineering Mechanics	Electrotechnics and Electronics	Fluid Mechanics	Engineering Thermodynamics
Theory and Design of Machines and Mechanisms	Fundamental Control of Energy and Power Engineering	Experimental Techniques for Fluid Machinery	Heat Transfer
			Engineering Chemistry

Materials Science and Engineering

Program Introduction

This program is comprehensive in scope, covering a wide spectrum of materials and allowing students to comprehend the fundamental principles that control the connections between processing, structure, characteristics, and material performance. Students are taught how to apply these concepts to the methodical design of novel materials.

MSE is a major focused on the structures and properties of all engineering materials. MSE graduates have a broad understanding of materials science and technology and can work as materials research workers or materials engineers, creating, manufacturing, analyzing, and testing a wide range of materials. Graduates can pursue careers in materials design and production, materials processing, manufacturing, or other related industries through research, education, development, and management.

Program Duration	4 Years
Tuition	20,000 CNY per Academic Year
College or Department	School of Materials Science and Engineering
Graduation Requirements	Pass all credits; Finish graduation project and defense; Pass HSK level 4
Degree Awarded	Bachelor of Engineering in Materials Science and Engineering

Key Courses

Engineering Graphics	Engineering Mechanics	Engineering Materials	Material Chemistry
Fundamental of Material Science	Electrical and Electronic Engineering	Fundamentals of Machine Design	Thermodynamics of Materials
Inorganic Chemistry			Analytic Chemistry

Mechanical Design, Manufacturing and Automation

Program Introduction

This major is designed to nurture applied engineering technology talents with the all-around growth of morals, intelligence, and physique that have the capacity to create, study, and technical manage mechanical and electrical goods using professional knowledge, as well as having strong application and development of engineering software. After graduation, students can work in mechanical design and production, engineering software application and development, and technical economic management in processing and manufacturing enterprises, national institutions, and scientific research colleges and universities. To comprehensively grasp the fundamental theories and knowledge of this major, as well as to be capable of drawing, designing, computing, experimentation, testing, document retrieval, and basic processing operations relevant to this major, as well as good computer application.

Program Duration	4 Years
Tuition	20,000 CNY per Academic Year
College or Department	School of Mechanical Engineering
Graduation Requirements	Pass all credits; Finish graduation project and defense; Pass HSK level 4
Degree Awarded	Bachelor of Engineering in Mechanical Design, Manufacturing and Automation

Key Courses

Mechanical Engineering	Mechanics	Fluid Dynamics
Basics of Mechanical Manufacturing Technology	Fundamentals of Control Engineering	Electrotechnics and Electronics
	Electromechanical Transmission Control	Engineering Graphics

Vehicle Engineering

Program Introduction

This program is devoted to train senior engineering and technical personnel, meeting the need of social development and economic construction, social sense of responsibility, good professional ethics and humanities cultivated manners, safe environmental protection consciousness. Students can master the basic theory of the vehicle engineering and related disciplines, professional knowledge and skills, international vision, innovation spirit, and practice ability for automobile and related industries. After graduation, students can choose to be an engineer, a project backbone or a management talent in the automotive industry with professional knowledge and engineering skills.

Program Duration	4 Years
Tuition	20,000 CNY per Academic Year
College or Department	School of Mechanical Engineering
Graduation Requirements	Pass all credits; Finish graduation project and defense; Pass HSK level 4
Degree Awarded	Bachelor of Engineering in Vehicle Engineering

Key Courses

Engineering Graphics	Foundation of Automatic Control	Engineering Mechanics
Mechanical Principle and Design	Automobile Theory	Electronics in Electrical Engineering
Fundamentals of Machinery Manufacturing	Intelligent Vehicle and Automatic Driving	Automobile Construction

Food, Chemistry & Pharmacy

S/N	Name of Program	Duration	Seats
1	Chemical Engineering and Technology	4 years	15
2	Food Quality and Safety	4 years	15
3	Food Science and Engineering	4 years	15
4	Pharmacy	4 years	30

Chemical Engineering and Technology

Program Introduction

The program is centered on the study of basic laws of chemical production processes and fundamental concepts, as well as associated production processes, research, designs, and optimization in the chemical engineering field. It is a multidisciplinary area of engineering that integrates natural and experimental science, as well as life sciences, mathematics, and economics, to design, develop, create, transform, transport, operate, and manage industrial processes that convert raw materials into useful products.

The School provides academic programs with a strong technical foundation that prepare students for professional practice in areas such as chemical process engineering, the application of chemical principles to industrial processes, problem solving, translating information into new processes and products, and exercising leadership in industry and academia on technical, economic, and social issues.

Program Duration	4 Years
Tuition	20,000 CNY per Academic Year
College or Department	School of Chemistry and Chemical Engineering
Graduation Requirements	Pass all credits; Finish graduation project and defense; Pass HSK level 4
Degree Awarded	Bachelor of Engineering in Chemical Engineering and Technology

Key Courses

Inorganic and Analytical Chemistry	Organic Chemistry	Physical Chemistry	Chemical Engineering Principles
Basic Chemical Equipment Mechanical	Chemical Meters and Automation	Chemical Reaction Engineering	Chemical Engineering Thermodynamics
Separation Engineering	Chemical Technology	Fine Chemical Technology	Industrial Catalysis

Food Quality and Safety

Program Introduction

This program aims to cultivate high-level engineering and technical talents with all-round moral, intellectual and physical grounding, as well as reasonable knowledge structure of food quality and safety. It also provides students with the ability to analyze and solve practical engineering problems, and to innovate and engage in scientific research and technology management. Students are expected to be engaged in food quality inspection and control, food safety management and supervision, food production management, health and wellness product development in engineering industries such as food, biology, medicine, pharmaceutical and chemical industries, especially in the field of food quality and safety.

Program Duration	4 Years
Tuition	20,000 CNY per Academic Year
College or Department	School of Food and Biological Engineering
Graduation Requirements	Pass all credits; Finish graduation project and defense; Pass HSK level 4
Degree Awarded	Bachelor of Engineering in Food Quality and Safety

Key Courses

Microbiology	Food Toxicology	Biochemistry and Molecular Biology	Principles of Food Technology
Food Chemistry	Food Quality Management	Principle of Food Engineering	
Food Hygiene	Food Processing Machinery and Equipment	Nutritionology	Food Nondestructive Testing Technology

Food Science and Engineering

Program Introduction

The curriculum gives students a solid understanding of all elements of food processing, including product creation that is in line with the most recent processing and industrial processes. BS Food Science and Technology is one of the fastest expanding disciplines, using knowledge not only from chemistry, biology, and food engineering, but also from business. The food technology program is intended to educate students with the most up-to-date information on sensory evaluation methodologies, innovative functional meals, and current food laws and regulations.

The goal is to instill in the student a knowledge of the nature, qualities, and features of foods as defined by biochemistry, chemistry, microbiology, physics, statistics, and nutrition. This curriculum teaches students about food processing, texture, flavor, food formulations, product development, and food safety. Students will explore activities used to preserve foods as well as unique methods utilized to manufacture daily goods.

Program Duration	4 Years
Tuition	20,000 CNY per Academic Year
College or Department	School of Food and Biological Engineering
Graduation Requirements	Pass all credits; Finish graduation project and defense; Pass HSK level 4
Degree Awarded	Bachelor of Engineering in Food Science and Engineering

Key Courses

Microbiology	Biochemistry	Organic Chemistry	Food Processing Machinery and Equipment
Modern food Detection Technology	Principle of food Engineering	Food Analysis	
Food Processing Machinery and Equipment and Modern Food Detecting Techniques have been certified as "National Quality Courses"			

Pharmacy

Program Introduction

The science and technology of producing and delivering medicines are the focus of pharmacy. It is a health profession that integrates health and chemical sciences to assure the safe and effective use of pharmaceutical medicines. The scope of pharmacy practice encompasses current health-care services such as clinical services, pharmaceutical safety and efficacy reviews, and drug information. Students will master the foundation of pharmaceutical sciences during their studies. They will learn about subjects such as medicine, chemistry, biology, and even ethics.

Program Duration	4 Years
Tuition	22,000 CNY per Academic Year
College or Department	School of Pharmacy
Graduation Requirements	Pass all credits; Finish graduation project and defense; Pass HSK level 4
Degree Awarded	Bachelor of Science in Pharmacy

Key Courses

Physical chemistry	Chemical engineering principle	Medicinal chemistry
Pharmaceutical analysis	Pharmacology	Pharmaceutical polymers
Industrial pharmacy	Biopharmaceutics and Pharmacokinetics	Process design workshop

Computer Science

S/N	Name of Program	Duration	Seats
1	Computer Science and Technology	4 years	30

Computer Science and Technology

Program Introduction

The Computer Science program provides a strong technical foundation for students wanting to enter the workforce after graduation as well as those interested in pursuing doctoral studies in computer science. Students will learn how to deal with cutting-edge technologies and will be able to choose extra modules that suit their interests and professional goals, ranging from cloud computing to bio-computation and machine learning. The emphasis is on acquiring both the software programming and hardware design skills required to start and improve an in this degree are well equipped for instant work in the computer industry or many other industries that increasingly rely on computer science.

Program Duration	4 Years
Tuition	20,000 CNY per Academic Year
College or Department	School of Computer Science and Communication Engineering
Graduation Requirements	Pass all credits; Finish graduation project and defense; Pass HSK level 4
Degree Awarded	Bachelor of Engineering in Computer Science and Technology

Key Courses

Programming in C++	Database Principle	Discrete Mathematics	Computer Architecture
Digital Logic Circuit Design	Principles of Microcomputer and Interfacing Technology	Data Structure	Digital Image Processing
Computer Organization		Operating System	Computer Networks
Software Engineering	The Design and Analysis of Algorithms		

Civil Engineering

S/N	Name of Program	Duration	Seats
1	Civil Engineering	4 years	30
2	Construction Management (Intelligent Construction and Management)	4 years	20

Civil Engineering

Program Introduction

Civil engineers have a lot of creative and technical leeway, and they get to view their work from a window or a rooftop. Civil engineering is concerned with the design and supervision of construction projects such as buildings, roads, bridges, and railways. It is one of the oldest engineering specialties, and civil engineers play a vital role in meeting human requirements. Civil engineers lay the groundwork for the start of each new project. The goal of the Civil Engineering Program is to provide students with professional and scientific information that will enable them to become effective performers in any sector, as well as to use civil engineering knowledge, problem solving abilities, and communication strategies. They can work in groups or as leaders, using ethical norms and processes codes of ethics within and outside traditional disciplinary learning.

Program Duration	4 Years
Tuition	20,000 CNY per Academic Year
College or Department	School of Civil Engineering and Mechanics
Graduation Requirements	Pass all credits; Finish graduation project and defense; Pass HSK level 4
Degree Awarded	Bachelor of Engineering in Civil Engineering

Key Courses

Engineering Mechanics	Steel Structure Design Principles	Structural Mechanics	Bridge Engineering
Foundation Engineering	Road Surveying and Design	Civil Engineering Materials	Engineering Economics
Civil Engineering Surveying and Construction	Concrete Structure Design Principle	Engineering Geology and Soil Mechanics	Architectural Structure Design
			Architecture and Planning

Construction Management

(Intelligent Construction and Management)

Program Introduction

Based on the demand of global infrastructure construction and economic development, this program is contributed to cultivate leading talents with lifelong learning, innovation ability and international vision. Students are able to master the relevant basic theory and professional knowledge of civil engineering, engineering management, mechanical engineering, electronic information science and engineering, control science and engineering, computer science and engineering and other subjects, with good social responsibility and professional ethics.

Program Duration	4 Years
Tuition	20,000 CNY per Academic Year
College or Department	Faculty of Civil Engineering and Mechanics
Graduation Requirements	Pass all credits; Finish graduation project and defense; Pass HSK level 4
Degree Awarded	Bachelor of Engineering in Construction Management

Key Courses

Intelligent Construction and Organization of Civil Engineering	International Construction Management	Fabricated Structure Design	Construction Robot Technology and Application
Basic Principle, Method and Application of Parametric Structure Design	Application and Practice of BIM	Intelligent Monitoring and Detection Technology of Structural Health	Project Construction Cost

Clinical Medicine

S/N	Name of Program	Duration	Seats in 2 Intakes
1	Clinical Medicine (MBBS)	6 years	90

Clinical Medicine (MBBS)

Program Introduction

Jiangsu University provides a five-year MBBS curriculum with an additional year of on-the-job training. The premedical stage tackles not just a large portion of the science that supports medicine, but also the clinical issues that occur when systems fail. Students are exposed to the various bodily systems and their structures. Furthermore, they are urged to acquire an inquisitive mindset to evaluate the experimental foundation of the course and comprehend clinically relevant issues. During the clinical stage, students will get hospital learning experience and spend a significant amount of time with patients.

Program Duration	6 Years
Tuition	34,000 CNY per Academic Year
College or Department	School of Medicine
Graduation Requirements	Collect all credits; Finish graduation project and defense; Pass HSK level 4; Complete 1-year internship
Degree Awarded	Bachelor of Medicine and Bachelor of Surgery

Key Courses

Histology	Organic Chemistry	Regional Anatomy	Pharmacology
Surgery	Pediatrics	Emergency Medicine	Internal Medicine
Radio diagnosis	Otorhinolaryngology		Neurology
Geriatrics		Ophthalmology	Oncology

Duration for all the above Ph.D. degree programs is four years. The instruction medium could be either English or Chinese. For graduation, students will have to meet all requirements relating to article publishing, thesis writing, defense, etc.

5. Pre-University Foundation Program

This program is going to prepare for your college study in a dynamic, supportive environment. JSU offers non-credit pre-university courses, and are designed as refresher courses for students who need improvement in the subjects considered essential for related first-year courses at JSU. At the end of the course, students who wish to take bachelor's degree courses at JSU need to apply for "Admission Entrance Exam for Overseas Students". Students who score well will be admitted to the next intake for bachelor's degree students.

Subjects: Mathematics, Physics, Chemistry, English

Duration: 1 semester

Intake: March and September

6. Scholarships

JSU offers many kinds of scholarships to international students. For more details about scholarships, please visit our website: <https://oec.ujs.edu.cn/en/SCHOLARSHIPS.htm>
Overseas Education College (OEC) of JSU reserves the right to explain all scholarships.

6.1 China Scholarship Council (CSC)

Funds by: Chinese Government

Scholarship type: Full Scholarship (Tuition + Accommodation + Living Expenses)

Applicants: Students of bachelor, master and Ph.D. programs

Application Information: <https://oec.ujs.edu.cn/jxj/zgzfjxj.htm>

The Agency Number of Jiangsu University is **10299**.

Age limit: CSC undergraduate (25), PG (35), Ph. D. (40)

6.2 International Chinese Language Teachers Scholarship

Scholarship winners are exempt from tuition, accommodation fees on campus, and are provided with monthly living allowance, and comprehensive insurance for foreign students studying in China.

Funds by: Center for Language Education and Cooperation (CLEC)

Applicants: Students of bachelor, master, non-degree

Scholarship amount: CNY 2,500 for Bachelor's degree students, one-academic-year students and one-semester students. CNY 3,000 for Master's degree students.

Website: <https://cis.chinese.cn/account/login> for scholarship application

6.3 Jiangsu Provincial Scholarship

In order to further promote the development of international students' education in Jiangsu Province, creating a "Study in Jiangsu" brand, and to enhance international attractiveness of Jiangsu higher education, Jiangsu Provincial government has set up the "Study in Jiangsu Government Scholarship".

Funds by: Jiangsu Provincial Department of Finance and Department of Education

Scholarship type: One-time Scholarship

Applicants: Full-time degree students (both undergraduates and postgraduates) in their second year or above.

*(Students who have ever got Chinese Government Scholarship or Jiangsu Provincial Scholarship CANNOT apply this scholarship.)

Application time: Subject to the document of Jiangsu Provincial Department of Education

Scholarship amount: 18,000CNY for undergraduates;

30,000CNY for postgraduate students

6.4 Jiangsu University Presidential Scholarship

In order to further develop the education of international students, Jiangsu University provides scholarship for international students getting registered for English-taught degree programs.

Funds by: Jiangsu University

Scholarship type: Partial Scholarship (discount on tuition)

Applicants: All master and Ph.D. students and some bachelor* students

Application time: During admission

Scholarship amount:

Ph.D.s: Full tuition and on-campus accommodation + 5000 CNY Stipend (Type A)

Full tuition and on-campus accommodation (Type B)

Masters: 25,000 CNY per year (Type A)

20,000CNY per year (Type B)

Bachelors (English-taught): 10,000 CNY in the first year

(*Students from targeted countries: 10,000 CNY/year on tuition every year)

Type A: New programs	<p>Freshmen from</p> <ul style="list-style-type: none"> ● Material Science and Engineering ● Agricultural Mechanization and Automation ● Construction Management (Intelligent Construction & Management) ● Energy and Power Engineering ● Food Quality and Safety ● Vehicle Engineering
Type B: Others	Freshmen passing the baseline exam in the top 10% or Top 2
From the second year, it is subject to the latest notice.	

Terms and Conditions:

Only applicable to overseas students who take English-taught degree programs. Students applying for Chinese-taught bachelor programs can get a 40% discount on tuition fee.

The JSU Presidential Scholarship to graduate students will be renewed once a year after annual evaluation of the students' performance (awarded scholarship

from the second year may increase or decrease according to evaluation points). Refer to our website for more details on JSU presidential scholarship.

Transferring of major by students who availed JSU Presidential Scholarship in the first year, shall be approved only after the student compensates the scholarship amount back to the university.

Age Limits: 25 for undergraduates, 30 for masters, 40 for Ph.Ds.

JSU reserves the right to explain or change the scholarship policy if necessary.

6.5 JSU School/Department Scholarships

No.	School / Faculty	Candidate	Funding Period	Coverage (CNY)	Funding Quota
1	School of Finance and Economics	Bachelor	Schooling	1,000	≤10%
		Master	Schooling	2,000	100%
		Ph.D.	Schooling	4,000	100%
2	School of Management	Ph.D.	Schooling	4,000 / 2000	30% / 30%-70%
3	School of Mechanical Engineering	Bachelor	2 nd -3 rd year	600~2,000	10 applicants
		Master	2 nd -3 rd year	1,500~2,000	All
		Ph.D.	2 nd -3 rd year	2,000~3,000	All
4	School of Computer Science and Telecommunications Engineering	Master	1 st year	1,000	100%
			2 nd -3 rd year	1,000~8000	≥40%
		Ph.D.	1 st year	2000	100%
			2 nd -4 th year	1,000~12,000	≥40%
5	School of Automotive and Traffic Engineering	Bachelor	Schooling	5,000	5 applicants
		Master	Schooling	5,000	5 applicants
		Ph.D.	Schooling	10,000	100%
6	School of Food and Biological Engineering	Bachelor	1 st year	4,000	All
			2 nd -4 th year	4,000	50%
		Master	Schooling	5,000~18,000	All
		Ph.D.	Schooling	5,000~30,000	All
7	Faculty of Civil Engineering and Mechanics	Master	3 years	2,000	5~6 applicants
		Ph.D.	4 years	5,000	2~3 applicants
8	School of Materials Science and Engineering	Bachelor	1 st year	10,000	All
			2 nd -3 rd year	2,000-10,000	All
		Master	3 years	5,000-15,000	All

No.	School / Faculty	Candidate	Funding Period	Coverage (CNY)	Funding Quota
8	School of Materials Science and Engineering	Ph.D.	3 years	6,000-24,000	All
9	Research Center of Fluid Machinery Engineering and Technology	Master	Schooling	1000-1500 per month	100%
		Ph.D.	Schooling	1200-2000 per month	100%
10	School of Literature	Master	1 st year	2,000	≤50%
11	School of Medicine	Master	Schooling	3,000~5,000	According to performance
		Ph.D.	Schooling	3,000~5,000	According to performance
12	Automotive Engineering Research Institute	Master	Schooling	5000	5 applicants
		Ph.D.	Schooling	10000	100%

Note:

Different schools reserve the right of explanation. Please check with different schools for details.

6.6 OEC Scholarship for Excellent Students

To encourage students with good academic performance, Overseas Education College (OEC) of JSU awards excellent students. During the beginning of every academic year, an annual assessment will be made and a fair selection will be published.

8.2 Application & Registration Dates

	Application Starting Date	Application Closing Date	Registration Starting Date
2023 Autumn Intake	April. 1 st , 2023	July. 31 st , 2023	Sep. 6 th , 2023
2024 Spring Intake	Nov. 11 th , 2023	Jan. 21 st , 2024	Feb.15 th , 2024

8.3 Application Procedure

STEP 1: Register your account and activate it via Online Application System

STEP 2: Fill out the application and upload all required documents as follows

A passport photo;

Copy of passport (the photo page);

Copy of your final degree transcript (Notarized English translation if applicable);

Copy of your final degree certificate (Notarized English translation if applicable);

English language proficiency certificate (non-English speaking countries);

Family financial statement;

HSK-4 certificate (for Chinese-Medium programs only);

Research proposal (Master and Ph.D. only);

2 recommendation letters (Master and Ph.D. only) from professor or associate professor;

Non-criminal Record;

Foreigner Physical Examination Form;

STEP 3: Submit the application and note your application number.

STEP 4: Pay application fee of CNY200 (non-refundable). E-mail the remittance slip to admission@uj.edu.cn if you pay through the bank.

STEP 5: Receive your admission notice through the application portal if accepted.

STEP 6: Pay seat reservation fees (non-refundable) before the due date. E-mail the remittance slip to admission@uj.edu.cn if you pay through the bank.

This fee will be deducted from the fee you should be paying after registering on campus.

Please check the next page for JSU bank account details.

STEP 7: Receive originals of "Admission Notice" and "JW202/JW201" form by post.

STEP 8: Apply for VISA and upload your arrival information at the application portal.

8.4 Tips for Faster & Successful Admission

- Always mention your online application number when making inquiries with us.
- Your CV must be complete and continuous until the current year. (Study or work experience)
- Check your admission status regularly.
- Doctoral applicants should take Research Proposal seriously.

9. China Stories from International Students

How JSU's 4Cs strategy push students to success?

Critical thinking: Here students can engage in learning experiences that require depth and complexity of thinking as they analyze, infer, compare, reason, interpret, synthesize, and evaluate.

Collaboration: JSU support to collaborate with others, respecting knowledge, cultures, differences, and viewpoints.

Communication: Communication skills should not just be limited to "verbal" conclusions but "actively" making real-world connections.

Creativity: JSU encourages students to demonstrate creativity in many forms and through multiple learning style preferences.

✧ **Kenny Anthony** from Indonesia, Fluid Machinery and Engineering 2017

“Through embracing diversity and fostering collaboration, JSU students discovered their hidden talents and unlocked all possibilities. During my studies at JSU, I have been elected as Community Teaching Assistant of MIT Center for Transportation and Logistics and have my proceedings paper published by MIT. Through the first-tier platform provided by Jiangsu University. I have been awarded the Chinese Government Outstanding International Student Award in 2020 and the Annual Top 10 Students in JSU in 2021.

I am now working for the development of the flagship project of the Belt and Road Initiative, the Jakarta-Bandung High-Speed Railway, to contribute to the shared future of mankind.

Jiangsu University has all you need to discover and unleash your potentials. You just need the right platform and to become the best version of yourself.”

✧ **Walter Munashe Chanaka** from Zimbabwe, MBA 2017

“‘Show me your wings and I will teach you how to fly’, these are the famous words of Prof. Dean Gao of OEC. Certainly, JSU is a place where talents are cultivated. Anyone can be successful if you have the right support system. I have managed to stay afloat because of the mentorship I receive from OEC and as a result I have managed to attain several awards such as 2017-19 Excellent student scholarship, 2019 CSC scholarship for outstanding international students in China, 2019 Zhenjiang Mayor’s award for social contribution, 2020 Excellent Graduate Award, 2021 Alibaba super start promotion ambassador.....

JSU is the right place to help you get where you are destined to be. It is the ideal place for you to gain academic skills and soft skills to excel in this contemporary world.”

✧ **Pulkit Sharma** from India, MBBS 2018

“JSU is called the ‘Cradle of the Doers’, and rightfully so. I have been awarded various Excellent Student Scholarships in numerous academic and extracurricular activities, including the Jiangsu Government Provincial Scholarship and other Enterprise Scholarships.

The JSU life brought the best out of me. In addition to the scholastic achievements, the boundless opportunities that I saw in every extracurricular field helped me broke out of my shell.

With due support and encouragement from the school, I performed at the ‘2019 Shared Joy in Jiangsu’ at the Nanjing Headquarters of Jiangsu Broadcasting Corporation. I also won various national, international level Chinese Language Proficiency Competitions including the ‘One Minute Creativity Competition’ organized by the ‘Chinese Bridge Club’.

Be it the various national and international level events that enhance various aspects of student life, or more so the intercultural exchanges with the local community, at JSU we get to experience them all.”

10. Means of Monitoring

The admission process shall be open, and the selection process shall be fair. You can contact the number below to complain about any misbehavior conducted.
